

Arman Ghazaryan

Full Stack Developer | React, TypeScript, Node.js, Tailwind CSS

Armenia | ghazaryanarman843@gmail.com | GitHub: Gamma431 | Portfolio: portfoliofront-d0a3.onrender.com

PROFILE

Passionate web developer focused on creating modern, responsive, and visually polished web applications. Experienced with React, TypeScript, Tailwind CSS, Node.js, Express, API integrations, and deployment workflows. Strong interest in building real products, solving frontend/backend problems, and improving through practical projects.

TECHNICAL SKILLS

Frontend	React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Framer Motion
Backend	Node.js, Express.js, REST APIs, dotenv, CORS, basic Prisma
Tools	Git, GitHub, VS Code, Render, Linux, npm, Vite
Focus	Responsive UI, API integration, portfolio systems, e-commerce layouts, dashboards

FEATURED PROJECTS

Portfolio Website

Personal developer portfolio built with React, TypeScript, and Tailwind CSS. Includes live Monkeytype stats through a custom Node.js backend API, contact form integration, glassmorphism UI, and deployed frontend/backend services.

Avalon

Modern PC hardware e-commerce concept with custom PC build configuration ideas, product browsing, and clean shopping-focused UI.

ManjiKey

Keyboard-focused e-commerce platform for mechanical keyboard enthusiasts, gamers, and creators. Built with modern React UI patterns and responsive product cards.

BackShotLibs

Music streaming web platform concept with playlist, discovery, and artist/album-focused interface design.

EXPERIENCE

Independent Developer / Personal Projects

Built and deployed multiple web projects using React, TypeScript, Tailwind CSS, and Node.js. Created frontend interfaces, integrated third-party APIs, handled deployment issues, improved image/assets paths for production, and developed real working portfolio features including email contact and live typing stats.

EDUCATION & LEARNING

Self-taught web developer with 2+ years of practical learning and project building. Currently expanding backend skills with Node.js, Express, API routes, environment variables, deployment, and Prisma basics.

ADDITIONAL STRENGTHS

Problem solving, fast learning, UI detail, PC hardware knowledge, Linux usage, consistency, and ability to turn ideas into working web products.
